

NGO Donation and Volunteer Management System

One easy system to manage donors, volunteers, and events

THE PROBLEM

Why NGOs Struggle Today

Too Many Tools

Using Excel, WhatsApp, and email separately is messy.

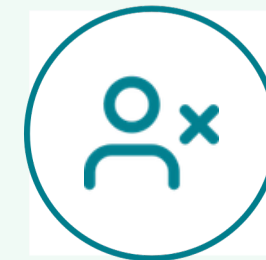

Wasted Time

Staff spend hours doing manual data entry instead of helping people.

Losing Donors

Donors stop giving when they don't see the impact of their money.

Hard to Connect

It is frustrating for volunteers to find events, and difficult for NGOs to find the right volunteers.

One System to Manage Everything

All-in-One Platform

Brings donors, volunteers, and campaigns into one place.

Replaces Spreadsheets

Keeps all information organized and safe.

Easy for Volunteers

Lets volunteers find events and manage their own schedules.

Automatic Reports

AI writes updates to prove to donors their money made a difference.

Staff Dashboard

Track Donors

- See who is donating
- See how much is raised

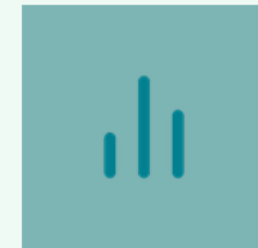

Plan Events

- Schedule events easily
- List needed volunteer skills

Smart Matching

- Auto-suggests volunteers
- Best fit for each event

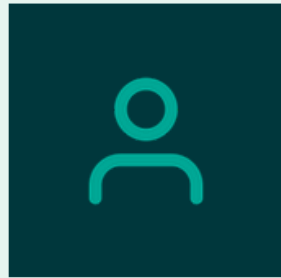

Quick Communication

- Send emails to everyone
- Send text messages at once

A PORTAL JUST FOR VOLUNTEERS

Volunteer Dashboard

Easy Setup

Volunteers create a profile with their skills and location.

Find Events

Search for upcoming events and apply with a single click.

Track Progress

See approved shifts and total hours worked over time.

Our Competitive Edge

What Makes Us Unique

AI Grant Proposal Generator

Problem: Writing a grant application from scratch takes weeks NGOs don't have.

Solution: AI reads your real funds-raised, campaign, and volunteer-hours data.

Result: A complete, submission-ready proposal — in one click.

Proactive Campaign Prediction

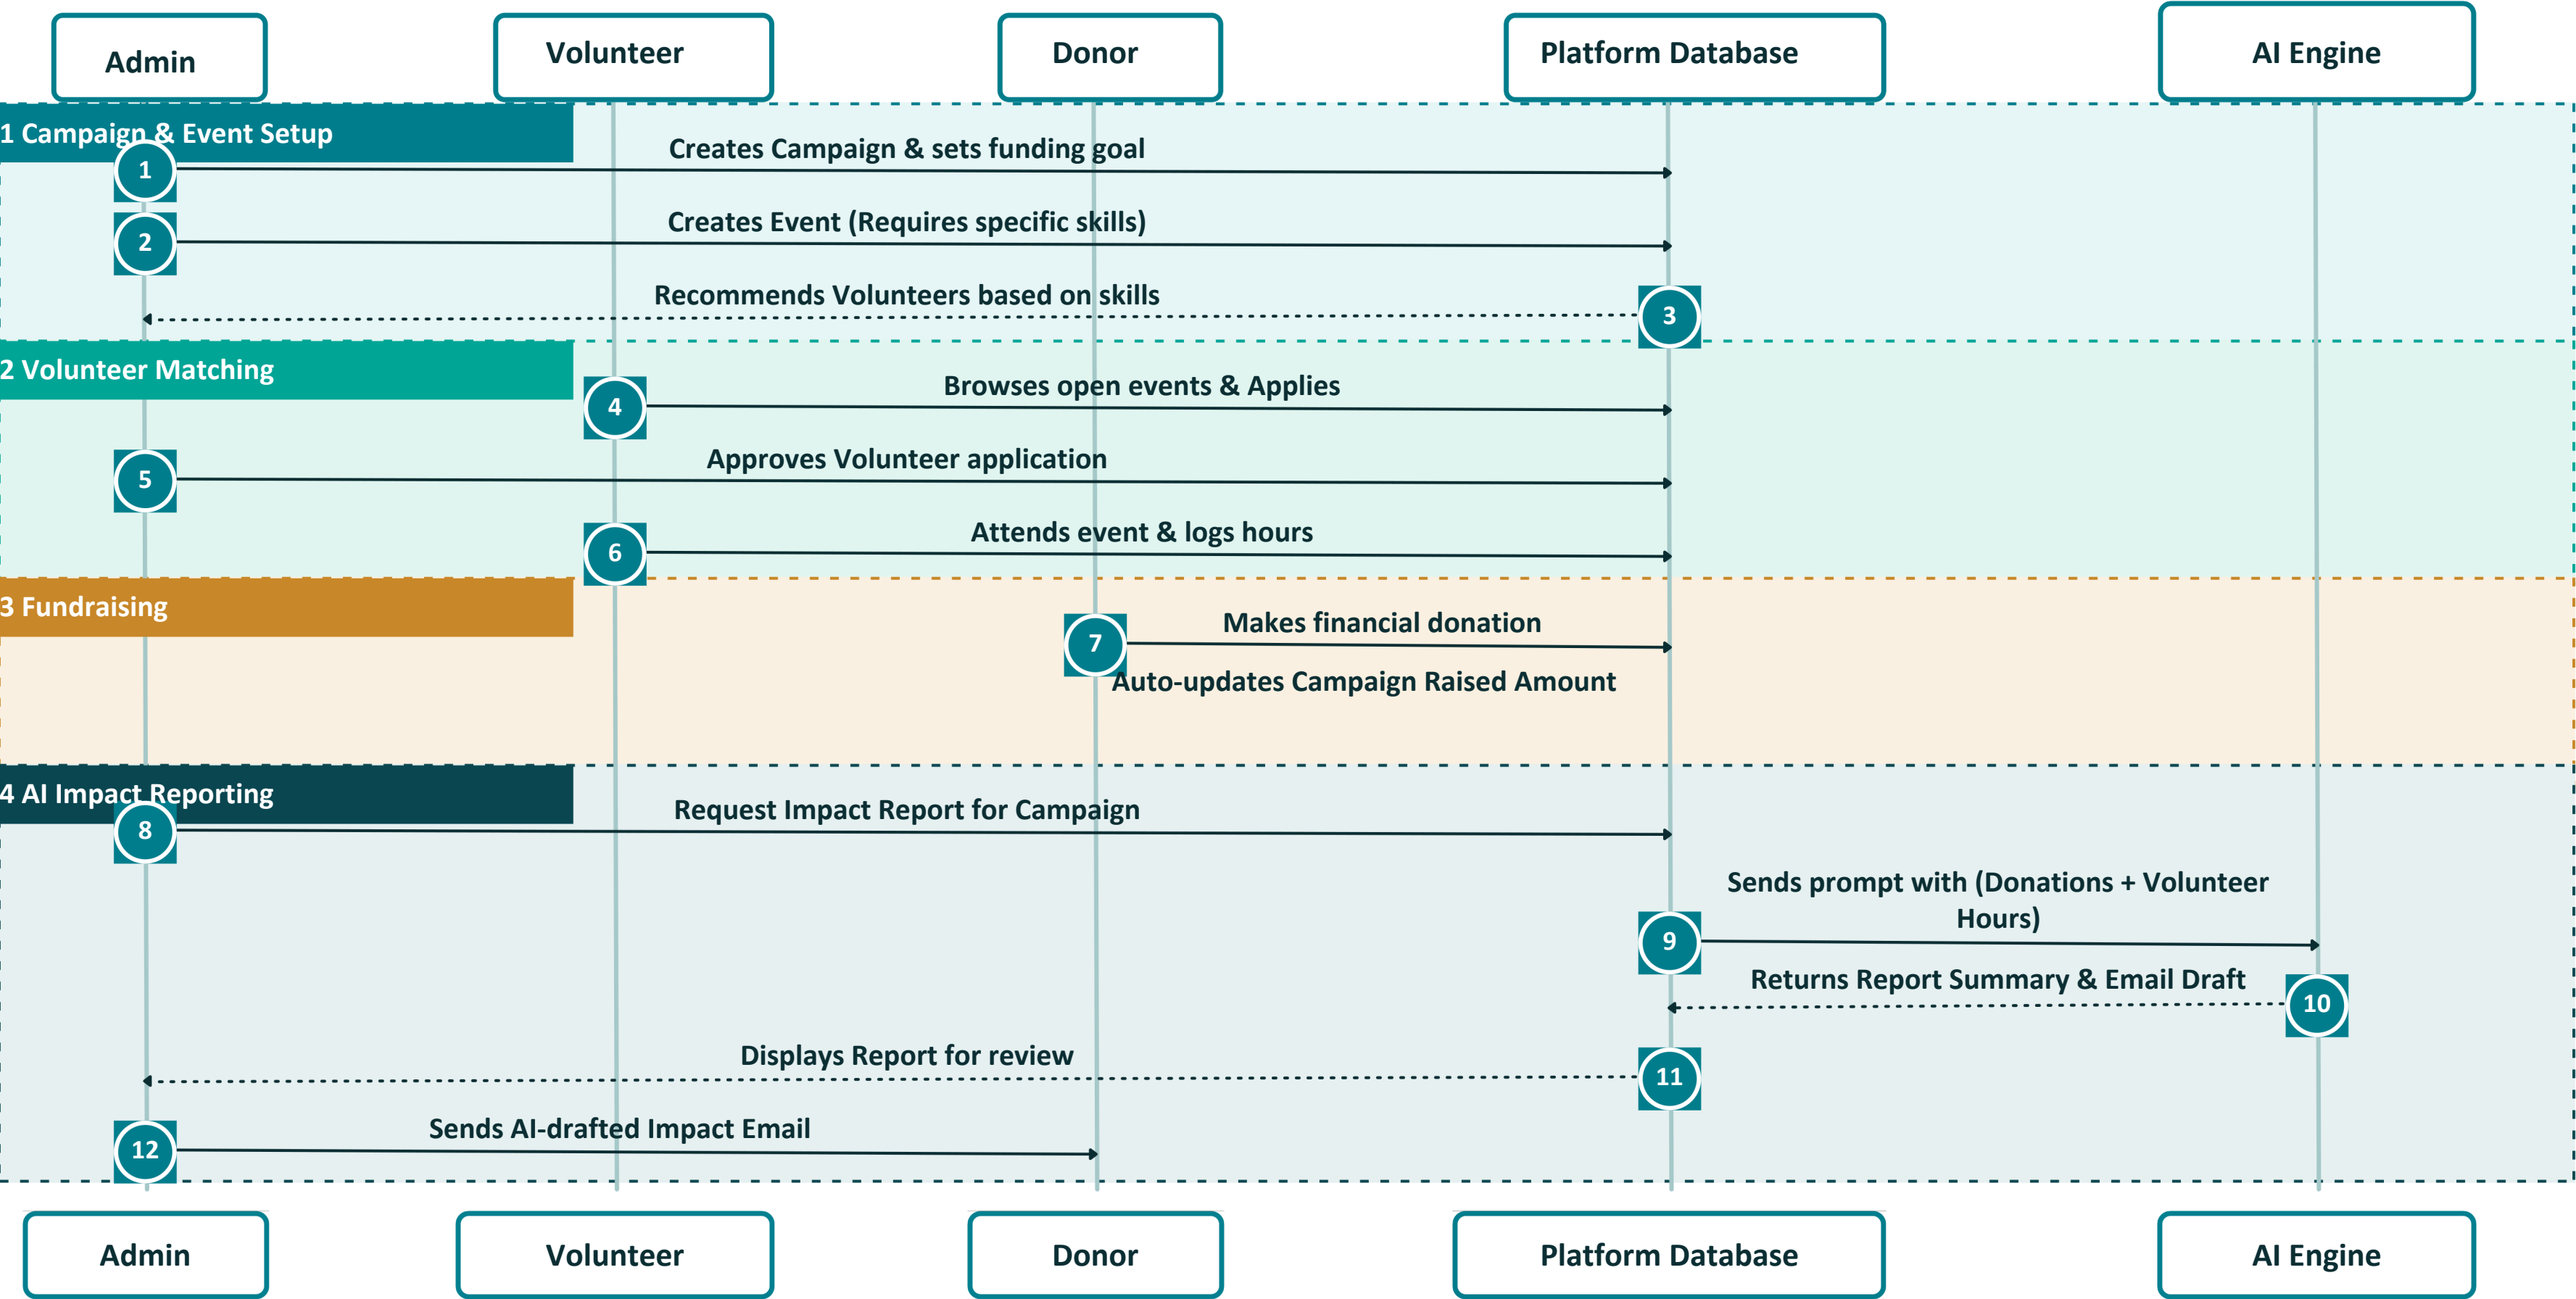

Problem: NGOs act only after a disaster has already hit.

Solution: AI watches live weather, 3 days ahead, for floods and storms.

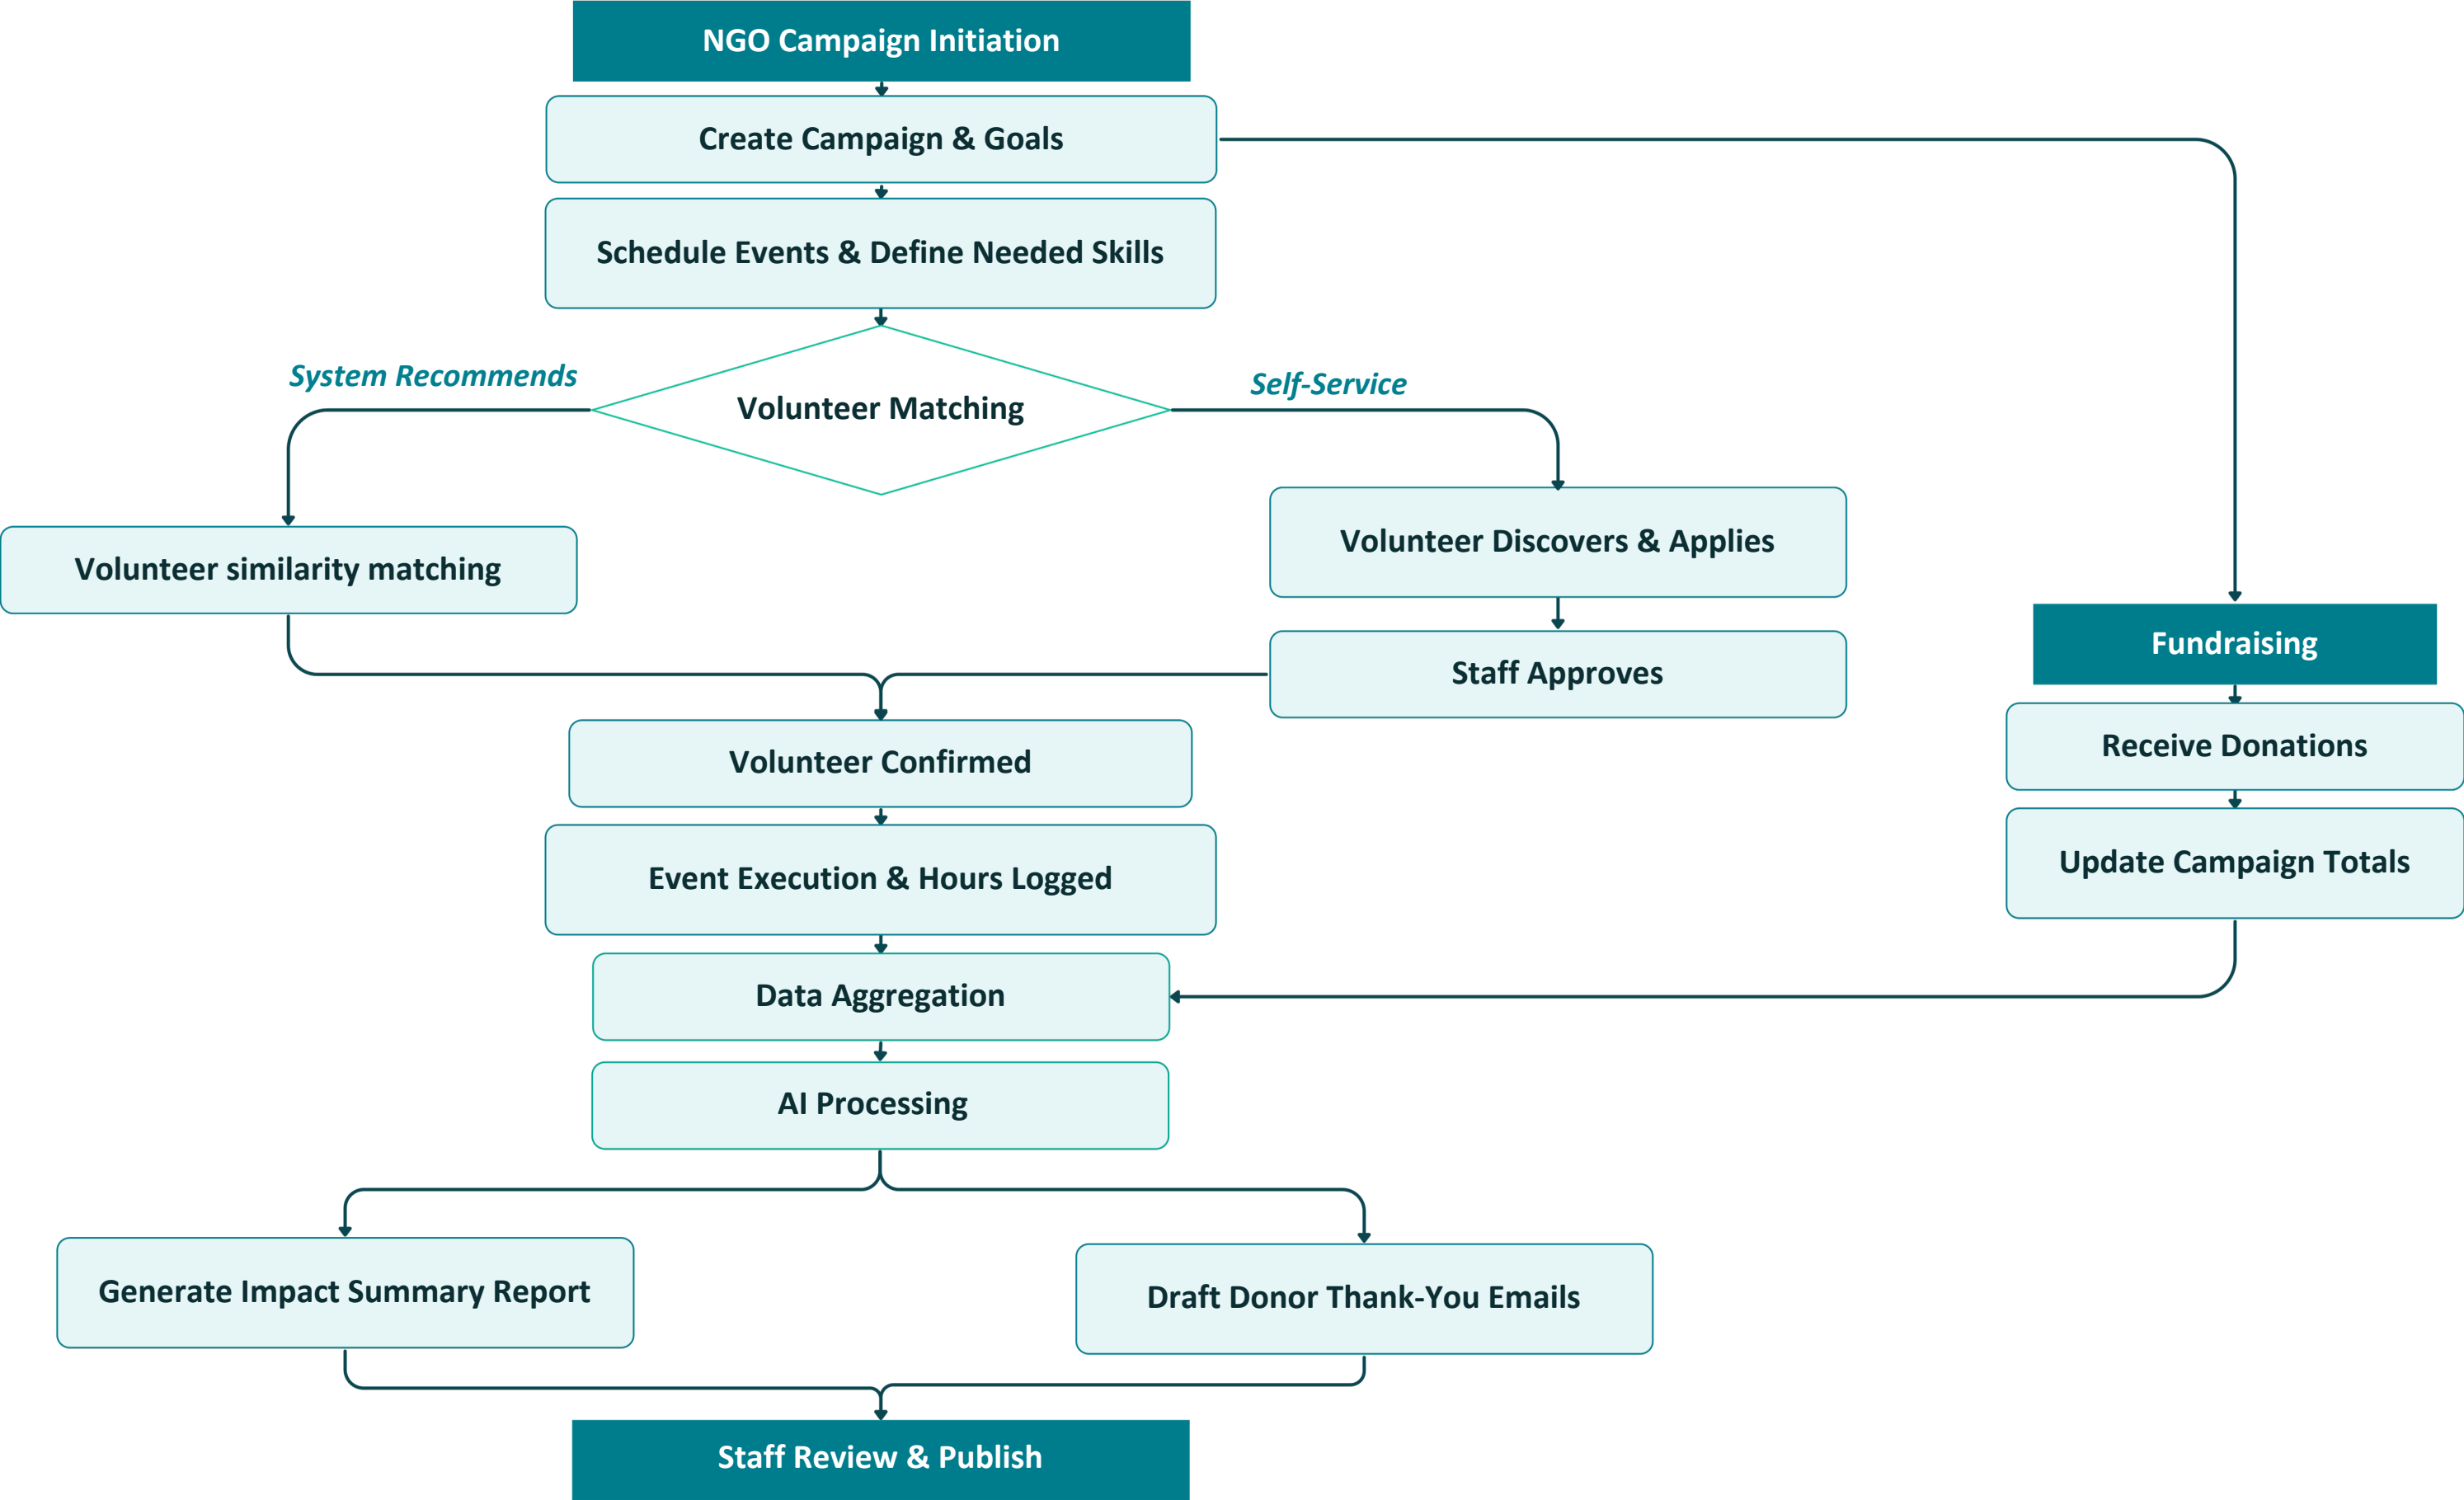

Result: Relief campaign auto-drafted, nearby volunteers alerted instantly.

Campaign-to-Impact Workflow

Technology Used

User Interface

Next.js and Tailwind CSS
great for phones and
computers.

Backend

Python and FastAPI
keeps the platform fast.

Database

Postgres
secure data storage.

AI Engine

NVIDIA NIM and Algo
powers the smart text
generation and similarity
matching

Payments

Paypal — safe online
donations.
Net Banking

How the Smart Features Work

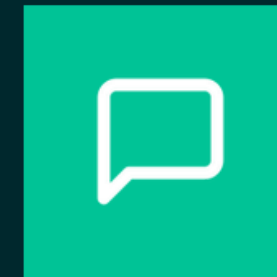

Matching Volunteers

Skill-Matching Algorithm

Word embedding, Jaccard algorithm or cosine similarity

The system compares the skills an event needs with the skills a volunteer has to find the perfect match.

AI Summaries

Smart Text Generation

NVIDIA NIM API

The AI takes raw numbers, like money and hours, event summary and turns them into a friendly, readable story.

Challenges

Sparse Data

Limited data can affect recommendation accuracy.

Awareness

Making volunteers, NGOs and donors aware of the platform and encouraging registration or donation.

Scalability

Handling increasing NGOs, volunteers, and events.

Basic to Start, Pay as You Grow

Basic Plan

₹999/month

- Up to 2 active events
- Up to 50 volunteers & 20 donors
- Basic Dashboard
- Basic volunteer Management
- 30 messages/mail per month

MOST POPULAR

Premium Plan

₹1999/month

- Unlimited events
- Unlimited volunteers & donors
- Analytics Dashboard
- Volunteer Recommendation based on similarity
- 100 messages/mail per month (For more contacts us)

Enterprise
